

# FarmIQ Freshwater Farm Plan Tool

## What are Freshwater Farm Plans (FWFP)?

Freshwater Farm Plans are a regulated farm planning process for farmers and growers that will provide a practical way to identify, manage and reduce the impact of farming on the freshwater environment.

## How can the FarmIQ FWFP tool help you?

FarmIQ has built a digital tool to simplify and guide you through the process of mapping your land, assessing your risks to freshwater, and building an action plan.

This is all linked to a digital map of your farm in FarmIQ, making it simple for farmers, farm advisors, certifiers and auditors to develop or monitor these plans all in one place.

The FarmIQ FWFP tool will help you:

- Map your land
- Complete a risk assessment
- Build a 5-year action plan

## Get the benefits

- Easy and straightforward to use online tool
- Be guided through your FWFP with bite-sized steps
- All of your FWFP info stored in one place
- Use the interactive and customisable FarmIQ map - tailored specifically to your farm
- Work alongside your farm team, consultants, accountants and other contractors
- Meet your council regulations
- Actions automatically appear as tasks in your FarmIQ diary
- Pin tasks on the map so your team can complete FWFP actions

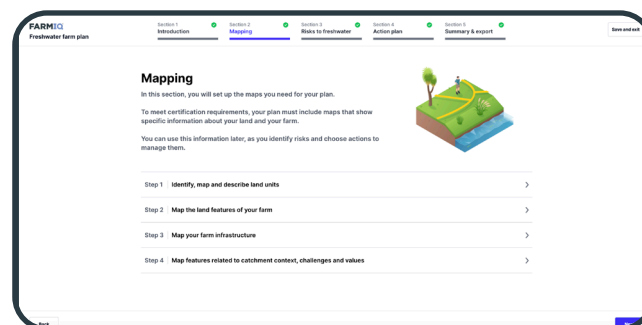

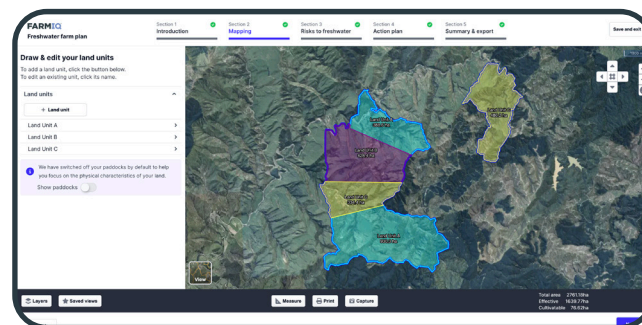

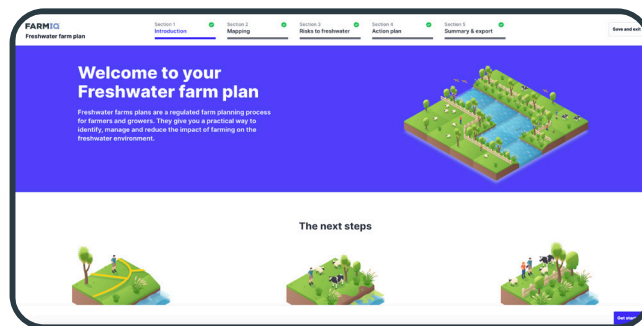

## How does the FarmIQ FWFP tool work?

The FWFP is available in all FarmIQ packs, meaning you get all of the other features included in your FarmIQ pack, from compliance and animals to feed and health and safety.

Once you've got a FarmIQ pack - or if you already have one - you'll be able to log in and start gathering your resources and mapping your land.

1. Log in to FarmIQ, head to the Land tab and click on your Freshwater Farm Plan
2. Follow the step-by-step guide and complete each section
3. Save your progress (you can save as you go, then pick back up where you left off at a later time)
4. Print, download and share your maps, action plan or other sections with whoever needs to see it
5. Add tasks to your FarmIQ map so you and your team know what jobs to complete and where, to reduce risks to freshwater
6. Review and update your plan - it is an evergreen document, so you can change it as need be

# The tool that will make sorting your FWFP a hell of a lot easier.

Available in all FarmIQ packs, with subscriptions starting from \$40 per month. Give us a bell to get started!
