

Choose the right FarmIQ pack for you

Got multiple farms? We've got a discount for that!

Get 25% off your second and third farms, and 50% off any farms after that.*

Lite

Start your farm management software journey with a digital map, digital diary and few basic compliance tools

Lite keeps things simple. With an interactive farm map, staff management tools, and key features to meet key rules and regulations.

\$42 per month excl. GST

Essentials

Have all your essential farm data at your fingertips to cover all things compliance and better decision-making

The Essentials pack is the ideal first step into farm recording, with all of your vital farm information in one place, and integrated NAIT reporting for all your stock movements. It has everything you need to plan, record and recall what's happening with your animals, land, staff and inventory in a way that's simple.

\$84 per month excl. GST

Performance+

Increase production and profitability with better stock and grazing management

The Performance+ pack helps you achieve your profit, production and sustainability goals for your farm. In addition to all the Essential pack features, there are a range of pasture and animal management tools to help you optimise the growth and use of your pasture.

\$190 per month excl. GST

Pro

Identify and manage individual animals that are helping your bottom line versus the ones that are hurting it

With EID recording and reporting, Pro lets you track the productivity and welfare of every single animal on your farm. It gives you the information required to optimise your livestock in an easy-to-understand format, plus powerful analysis of the entire farm operation.

\$249 per month excl. GST

*Discounts are applied to farms in order of their pack. Any farms on lower-level packs will receive the higher discounts.
